INDEX TO VOLUME XXII

Acetone-butyl alcohol fermentation, Inhibition of the, by acids..... 209
Acids, Inhibition of the acetone-butyl alcohol fermentation by..... 209
Aerobic bacterium, On the decomposition of agar-agar by an..... 91
Agar-agar, On the decomposition of, by an aerobic bacterium..... 91
Agglutination, The serologic, of *Bacillus Sordellii* and *Clostridium oedematoides*..... 375
Aggressins. An outline of the development of the theory and notes on the use of these products..... 323
Aschner, M. and Kligler, I. J. Cultivation of Rickettsia-like microörganisms from certain blood-sucking pupipara..... 103
Atkins, Kenneth N., Gay, Frederick P. and Holden, Margaret. The resistance of dehydrated pneumococci to chemicals and heat..... 295
Azotobacter chroococcum of Beijerinck and its composition, Gum production by..... 249

Bact. aerogenes, The relative persistence of *Bact. coli* and, in nature. I. In decayed stumps..... 433
Bact. coli and *Bact. aerogenes*, The relative persistance of, in nature. I. In decayed stumps..... 433
Bacilli, Five cases of infection of the urinary tract due to a member of the group of, named after Morgan..... 261
Bacillus Sordellii and *Clostridium oedematoides*, The serologic agglutination of..... 375
Bacteria, Filter passing anaerobic, of the upper respiratory tract in health and during acute respiratory disease..... 309
Bacteria, The behavior of acid-fast, in oil and water systems..... 239
Bacterial fluorescence in various media, Study of. I. Inorganic substances necessary for bacterial fluorescence..... 349
—— viability, The specific potency of certain cations with reference to their effect on..... 49
Bacteriological culture media, Determination of carbohydrates in..... 31
Bacteriology, The, of pulp slime..... 15
Bacteriophage, Factors in the preparation of..... 199
——, Studies on the electrical charge of..... 255
——, The recovery of, from filtrates derived from heated spore-suspensions... 119
Bavendamm, W. and Waksman, Selman A. On the decomposition of agar-agar by an aerobic bacterium..... 91
Beckwith, T. D. The bacteriology of pulp slime..... 15
Behavior, The, of acid-fast bacteria in oil and water systems..... 239
Beijerinck, Gum production by *Azotobacter chroococcum* of, and its composition..... 249

Biologic products, The efficiency of certain germicides in the preservation of..... 403
Burky, E. L. and Freese, H. L. Filter-passing anaerobic bacteria of the upper respiratory tract in health and during acute respiratory disease..... 309

Carbohydrates, Determination of, in bacteriological culture media..... 31
Castles, Ruth and Miller, C. Phillip, Jr. The effect of sodium ricinoleate on the gonococcus..... 339
Chinn, Ben, Ruchhoft, C. C., Kallas, J. G. and Coulter, E. W. Coli-aerogenes differentiation in water analysis. II. The biochemical differential tests and their interpretation..... 125
Churchman, John W. Modification of Kolle flask..... 29
Clifton, C. E. and Madison, R. R. Studies on the electrical charge of bacteriophage..... 255
——, Schultz, E. W. and Gebhardt, L. P. Ultrafiltration studies on the virus of poliomyelitis..... 7
Clostridium oedematoides, The serologic agglutination of *Bacillus Sordellii* and..... 375
Coli-aerogenes differentiation in water analysis. II. The biochemical differential tests and their interpretation..... 125
Coulter, E. W., Ruchhoft, C. C., Kallas, J. G. and Chinn, Ben. Coli-aerogenes differentiation in water analysis. II. The biochemical differential tests and their interpretation..... 125
Cowles, Philip B. The recovery of bacteriophage from filtrates derived from heated spore-suspensions..... 119
Cultivation of Rickettsia-like microörganisms from certain blood-sucking pupipara..... 103

Determination of carbohydrates in bacteriological culture media..... 31
Differential tests and their interpretation, The biochemical. Coli-aerogenes differentiation in water analysis. II..... 125

Effect, The, of sodium ricinoleate on the gonococcus..... 339
Efficiency, The, of certain germicides in the preservation of biologic products..... 403
Electrical charge of bacteriophage, Studies on the..... 255

Factors in the preparation of bacteriophage..... 199
Filter-passing anaerobic bacteria of the upper respiratory tract in health and during acute respiratory disease..... 309
Five cases of infection of the urinary tract due to a member of the group of bacilli named after Morgan..... 261
Freese, H. L. and Burky, E. L. Filter-passing anaerobic bacteria of the upper respiratory tract in health and during acute respiratory disease..... 309
Fluorescence, bacterial, Inorganic substances necessary for. Study of bacterial fluorescence in various media. I..... 349
Fulmer, Ellis I. and Schopmeyer, Herman. The production of yeast-growth stimulants by the molds..... 23

Gallagher, Constance D. Observations on variants derived from two strains of *Streptococcus hemolyticus*..... 363
Gay, Frederick P., Atkins, Kenneth N. and Holden, Margaret. The resistance of dehydrated pneumococci to chemicals and heat..... 295
Gebhardt, L. P., Clifton, C. E. and Schultz, E. W. Ultrafiltration studies on the virus of poliomyelitis..... 7
Georgia, F. R. and Poe, Charles F. Study of bacterial fluorescence in various media. I. Inorganic substances necessary for bacterial fluorescence..... 349
Germicides, The efficiency of certain, in the preservation of biologic products..... 403
Gonococcus, The effect of sodium ricinoleate on the..... 339
Gum production by *Azotobacter chroococcum* of Beijerinck and its composition..... 249

Hall, Ivan C. and Scott, Albert L. The serologic agglutination of *Bacillus Sordelli* and *Clostridium oedematoides*..... 375
Hamilton, W. Brooks. Gum production by *Azotobacter chroococcum* of Beijerinck and its composition..... 249
Haywood, Eloise T. and Winslow, C.-E. A. The specific potency of certain cations with reference to their effect on bacterial viability..... 49
High temperatures, Streptococci which grow at..... 275
Holden, Margaret, Gay, Frederick P. and Atkins, Kenneth N. The resistance of dehydrated pneumococci to chemicals and heat..... 295
Horgan, E. S. The value of serological tests for the identification of *Pseudomonas malvacearum*..... 287

Inhibition of the acetone-butyl alcohol fermentation by acids..... 209
Inorganic substances necessary for bacterial fluorescence. Study of bacterial fluorescence in various media. I..... 349

Kallas, J. G., Ruehhoft, C. C., Chinn, Benn and Coulter, E. W. Coli-aerogenes differentiation in water analysis. II. The biochemical differential tests and their interpretation..... 125
Keller, Margaret. Factors in the preparation of bacteriophage..... 199
Klein, Sidney J. and Stone, Florence M. The lysis of pneumococcus by saponin..... 387
Kligler, I. J. and Aschner, M. Cultivation of Rickettsia-like microörganisms from certain blood-sucking pupipara..... 103
Kolle flask, Modification of..... 29
Kullmann, Ethel D. and Wilson, P. W. A statistical inquiry into methods for estimating numbers of Rhizobia..... 71

Lipman, Charles B. Living microörganisms in ancient rocks..... 183
Living microörganisms in ancient rocks..... 183
Lysis, The, of pneumococcus by saponin..... 387

Madison, R. R. and Clifton, C. E. Studies on the electrical charge of bacteriophage..... 255

Malcolm, W. G. The efficiency of certain germicides in the preservation of biologic products..... 403
Microörganisms, Living, in ancient rocks..... 183
——, Pathogenicity and classification of..... 427
Miller, C. Phillip, Jr. and Castles, Ruth. The effect of sodium ricinoleate on the gonococcus..... 339
Modification of Kolle flask..... 29
Molds, The production of yeast-growth stimulants by the..... 23
Moore, Veranus Alva, 1859–1931..... 1
Morgan, Five cases of infection of the urinary tract due to a member of the group of bacilli named after..... 261

Nature, The relative persistence of *Bact. coli* and *Bact. aerogenes* in. I. In decayed stumps..... 433
Noble, Ralph E. and Tonney, Fred O. The relative persistence of *Bact. coli* and *Bact. aerogenes* in nature. I. In decayed stumps..... 433

Observations on variants derived from two strains of *Streptococcus hemolyticus*..... 363
Oil and water systems, The behavior of acid-fast bacteria in..... 239
On the decomposition of agar-agar by an aerobic bacterium..... 91

Pathogenicity and classification of microörganisms..... 427
Pneumococcus, The lysis of, by saponin..... 387
Poe, Charles F. and Georgia, F. R. Study of bacterial fluorescence in various media. I. Inorganic substances necessary for bacterial fluorescence..... 349
Poliomyelitis, Ultrafiltration studies on the virus of..... 7
Pribram, Ernest A. Pathogenicity and classification of microörganisms..... 427
Production, The, of yeast-growth stimulants by the molds..... 23
Pseudomonas malvacearum, The value of serological tests for the identification of..... 287
Pulp slime, The bacteriology of..... 15
Pupipara, certain blood-sucking, Cultivation of Rickettsia-like microörganisms from certain..... 103

Recovery, The, of bacteriophage from filtrates derived from heated spore-suspensions..... 119
Reed, Guilford B. and Rice, Christine E. The behavior of acid-fast bacteria in oil and water systems..... 239
Relative, The, persistence of *Bact. coli* and *Bact. aerogenes* in nature. I. In decayed stumps..... 433
Respiratory disease, Filter-passing anaerobic bacteria of the upper respiratory tract in health and during acute..... 309
Rice, Christine E. and Reed, Guilford B. The behavior of acid-fast bacteria in oil and water systems..... 239
Rickettsia-like microörganisms, Cultivation of, from certain blood-sucking pupipara..... 103
Rhizobia, A statistical inquiry into methods for estimating numbers of..... 71

Rocks, ancient, Living microörganisms in..... 183
Ruchhoft, C. C., Kallas, J. G., Chinn, Ben and Coulter, E. W. Coli-aerogenes differentiation in water analysis. II. The biochemical differential tests and their interpretation..... 125

Saponin, The lysis of pneumococcus by..... 387
Schmidt, Clarence F., Jr. Determination of carbohydrates in bacteriological culture media..... 31
Schopmeyer, Herman and Fulmer, Ellis I. The production of yeast-growth stimulants by the molds..... 23
Schultz, E. W., Gebhardt, L. P. and Clifton, C. E. Ultrafiltration studies In the virus of poliomyelitis..... 7
Scott, Albert L. and Hall, Ivan C. The serologic agglutination of *Bacillus Sordellii* and *Clostridium oedematoides*..... 375
Scott, Joseph P. Aggressins. An outline of the development of the theory and notes on the use of these products..... 323
Serologic, The, agglutination of *Bacillus Sordellii* and *Clostridium oedematoides*..... 375
Serological tests, The value of, for the identification of *Pseudomonas malvacearum*..... 287
Sherman, James M. and Stark, Pauline. Streptococci which grow at high temperatures..... 275
Sodium ricinoleate, The effect of, on the gonococcus..... 339
Specific, The, potency of certain cations with reference to their effect on bacterial viability..... 49
Spore-suspension, The recovery of bacteriophage from filtrates derived from heated..... 119
Stark, Pauline and Sherman, James M. Streptococci which grow at high temperatures..... 275
Statistical, A, inquiry into methods for estimating numbers of Rhizobia..... 71
Stone, Florence M. and Klein, Sidney J. The lysis of pneumococcus by saponin..... 387
Streptococci which grow at high temperatures..... 275
Streptococcus hemolyticus, Observations on variants derived from two strains..... 363
Studies on the electrical charge of bacteriophage..... 255
Study of bacterial fluorescence in various media. I. Inorganic substances necessary for bacterial fluorescence..... 349
Tonney, Fred O. and Noble, Ralph E. The relative persistence of *Bact.coli* and *Bact. aerogenes* in nature. I. In decayed stumps..... 433

Ultrafiltration studies on the virus of poliomyelitis..... 7
Urinary tract, Five cases of infection of the, due to a member of the group of bacilli named after Morgan..... 261

Value, The, of serological tests for the identification of *Pseudomonas malvacearum*..... 287

Variants, derived from two strains of *Streptococcus hemolyticus*, Observations on..... 363

Waaler, Erik. Five cases of infection of the urinary tract due to a member of the group of bacilli named after Morgan..... 261
Waksman, Selman A. and Bavendamm, W. On the decomposition of agar-agar by an aerobic bacterium..... 91
Water analysis, Coli-aerogenes differentiation in. II. The biochemical differential tests and their interpretation..... 125
Wilson, P. W. and Kullmann, Ethel D. A statistical inquiry into methods for estimating numbers of Rhizobia..... 71
Winslow, C.-E. A. and Haywood, Eloise T. The specific potency of certain cations with reference to their effect on bacterial viability..... 49
Wynne, A. M. Inhibition of the acetone-butyl alcohol fermentation by acids..... 209

Yeast-growth stimulants, The production of, by the molds..... 23
